

HARNESS YOUR POTENTIAL to make an impact on billions of lives

The Institute for Health Metrics and Evaluation (IHME) Post-Bachelor Fellowship

Using big data to improve the world's health

At IHME, we organize and analyze the world's health data to make better decisions about important health problems.

Post-Bachelor Fellows (PBFs) at IHME impact the health of billions of people by analyzing data and developing new tools and methods. This requires ambitious ideas and insights from a variety of disciplines, from computer science, to economics, to anthropology.

As a PBF, you will join a community of passionate researchers in our fast-paced and dynamic research institute. We value diversity, innovation, and critical-thinking.
